

At the end of the lesson, the student will be able to:

- * to explain why we need to set priorities in life.
- * discuss some priorities in one's career and life path.

Read

What are your priorities when you buy a car?

Of course, the first priority is price. I'd like to buy a cheap model with cash, so I wouldn't have to borrow any money, if possible. I'm willing to buy an old car to get the best bargain. Design and make are also important factors to me. And you know gas is getting expensive these days, so everybody is concerned about mileage. I like compact cars because they are economical in terms of taxes, gas, insurance, etc. Another advantage is that thieves are never interested in small cars.

Talk about your priorities:

1. When you choose where to honeymoon.
2. When you are looking for a girlfriend or boyfriend.
3. When you want a place to live.
4. When you decide your college major.
5. When you choose a restaurant for lunch.
6. When you are job searching.
7. When you choose where to spend your vacation.
8. When you choose a school for your children.
9. When you subscribe to a newspaper.
10. When you shop for clothes.
11. When you decide on a hobby.
12. When you need a doctor.
13. When you want to change jobs.
14. When you get someone a gift.
15. When you have two important events to attend, but they are at the same time.
