

**At the end of the lesson, the student will be able to:**

\* share ideas on how the tobacco connects to poverty; mention some negative effects of tobacco smoking and reasons why this hasn't subsided despite the efforts to eradicate it.

## Read the Passage

It is well known that tobacco smoking kills millions, but it also **exacerbates** poverty, contributes to world hunger by **diverting** prime land away from food production, damages the environment and reduces economic productivity. **Second hand smoking** also affects other people's lives.

Despite many attempts to prevent it, a global tobacco control treaty became international law in 2005.

However, challenges still remain as tobacco companies try to **hit back**, for example, by targeting developing nations, increasing advertising at children and women, attempting to **undermine** global treaties and influence trade talks, etc.
